

Professional Skills

Professional Skills are those which are essential to the highly developed and accredited professions of the 21st century. Characteristically they are a set of skills, developed to graduate level, which may be transferred across careers.

The *Aspire* programme aims to support students' skills development through its Professional Scholarship Programme and throughout the student's learning experience.

Working with tutors to:

- ◆ Develop work-based resources in support of students' professional skills development
- ◆ Identify opportunities for Personal Development Planning
- ◆ Evaluate and refine support for Personal Development Planning
- ◆ Explore new approaches to the assessment of students' professional skills
- ◆ Identify staff research skills requirements and deliver a programme of support in research design and analysis
- ◆ Collate and develop online Research Methods resources and activities
