Masstock
SMART FARMING

The Masstock Arable (UK) Ltd

Postgraduate Scholarship at

Harper Adams University College

Masstock Arable (UK) Ltd

Masstock Arable is the UK's leading agronomy-led input supplier, working with many of the country's most successful farming businesses. Masstock provide advanced arable management and business advice and access to input technology (crop protection, seed and fertiliser) to maximise crop performance and financial returns for customers. Masstock is part of Origin Enterprises, an Irish Plc group, encompassing agri-inputs, food processing and direct farming activities.

The Masstock scholarship will provide exceptional insight and experience in all aspects of a modern arable supply business – agronomy, product management, environmental stewardship, advanced arable research and innovative information transfer via their 'SMART Farm' network.

Masstock have distribution partnerships with the major R&D input manufacturers, so this opportunity will also provide an insight into the development of technologies that will shape the future for food production and farmer support services.

The Benefits of the Scholarship

Masstock wish to secure the best people and tools to keep their farming customers successful and as a consequence they have partnered with Harper Adams to secure a scholar, with the ultimate goal of employment upon successful completion of their degree.

The scholarship being offered by Masstock is valued at £4,500. The award is exclusive to students studying at postgraduate level and is offered to UK residents only. It will be necessary for those students interested in this award to apply in writing – either hand written or typed. Please note that email applications will NOT be accepted.

The University College will assess the applications and will make a recommendation to the Trust as to the most suitable candidate(s), who will then be interviewed by Masstock and the Scholarship Panel.

The scholarship will be paid in two instalments in February and May.

Please note that the Masstock Scholarship is offered on a competitive basis, and therefore Masstock, in conjunction with the Scholarship Panel, reserve the right not to award any scholarship if they feel that there are no suitable applicants.

We are dedicated to improving farming, food production and the rural economy by growing the talents of the people on which their futures depend through the best possible learning environment and support.
